

Brainstorming Assignments for Specific Learning Targets

*"I am designing an online [course name] for college students. Below are the learning targets I want students to achieve:
[list learning targets].

Please brainstorm **5 engaging assignment ideas** that:

Match directly to these learning targets,
Encourage student interaction and critical thinking (beyond rote memorization),
Work well in an online environment (Canvas),
Include accessibility considerations (e.g., multiple formats, alternative text, options for choice in demonstrating knowledge), and
Are designed to keep students motivated and connected to real-world applications.

For each assignment idea, explain:

The student task,
Which learning target(s) it aligns with,
How it can be made accessible for all learners."*
