

Interview Preparation Activity with ChatGPT Voice Mode - Student Reflections:

Translated German Reflection Question (below): 3. Please reflect on the experience in English in 50-100 words. Did things go well? Did you have to give ChatGPT instructions multiple times? What went well? What didn't go so well? Did ChatGPT stick to the German Interview customs, or did it simply invent its' own rules?

3. Reflektieren Sie über die Erfahrung auf Englisch in 50-100 Wörtern. Hat alles gut geklappt? Mussten Sie ChatGPT mehrfach neue Anweisungen geben? Was ist gut gelaufen? Was ging nicht so gut? Hat sich ChatGPT an die deutschen Interviewgepflogenheiten gehalten oder einfach eigene Regeln erfunden?

1. I was very impressed with the Voice Mode option in ChatGPT because I have never used it before. I thought that the interview went well and ChatGPT was able to compose a solid German interview given my prompt and the job posting. The only thing I found difficult was trying to repeat the interview so I could give better responses to some questions; it was hard for ChatGPT to understand and I wasn't able to do the interview again. However, the AI overall provided good questions and answers, and I thought we had a decent job interview.

My opening prompt was:

I am practicing doing job interviews in German. In German please interview me as if I am applying for this job. Ensure you follow all typical German interview procedures. The interview must be at least 10 minutes but cannot be longer than 15 minutes. Please conduct this interview with me through your voice mode.

With the job posting attached as a pdf

I was very well prepared for the interview, so I answered a lot of the questions poorly and wasn't very confident. Before entering the ChatGPT voice mode, it seemed to have a good grasp of what questions it should ask and what the german interview practices were. ChatGPT started off the interview well but after the introduction questions it would begin to mishear me or think I stopped talking when I didn't. After that it kind of just ended the interview which was really weird so I wasn't even really able to finish.

Ich denke, dass diese Technologie war super! Aber auch macht mir ein bisschen Angst. Es klingt so realistisch! Ich würde gern diese Strategie in meiner Zukunft zu benutzen. Es könnte mir helfen, mich mit dem Vorstellungsgespräch zu präparieren.

Translated reflection: I think that the technology was great! But it also scares me a little. It sounded so realistic! I would definitely use this strategy in my future. It could help me prepare for job interviews.
